Education

•Bachelor of Engineering(Information Technology)

Vardhaman College of Engineering ,Shamshabad,Hyderabad

2023-27

CGPA: 8.83

•Board of Intermediate Education, Telangana

Mahatma Jyothibha Phule,Warangal

2021-23

Percentage: 95.3

Personal Projects

•Context Aware Emotion Monitoring System using Temporal Analysis

Developed an AI-powered facial emotion recognition system using deep learning and computer vision for real-time emotion monitoring.

- Built a context-aware emotion monitoring framework using Python, TensorFlow, OpenCV, and FER2013, leveraging temporal analysis to improve prediction consistency and provide more accurate real-time emotion insights.

•Customer Segmentation Dashboard

Developed an interactive Tableau dashboard to analyze customer behavior and identify customer segments.

- Created dynamic visualizations and KPI dashboards to identify customer segments based on demographics and spending trends, enabling data-driven business insights.

•AI-Based Driver Drowsiness Detection System

Built an AI-powered driver drowsiness detection system for real-time driver monitoring.

- Implemented facial landmark and eye-state detection using Python, OpenCV, and Dlib/MediaPipe to identify signs of drowsiness and trigger an alert for timely driver intervention.

Certifications

Artificial Intelligence Application Developer • Salesforce Certified Agentforce Specialist • Python Essentials •

Generative AI for Data Science (Coursera)

• AWS Cloud practitioner Essentials • Data Analytics Job Simulation • Web Development

Internships

•Web Development Intern

VaultofCodes (AICTE Internship Program)

- Developed responsive web applications using HTML, CSS, JavaScript, and Bootstrap.Implemented interactive web pages and enhanced user interface functionality through practical web development projects.

•Deloitte Virtual Internship

Deloitte

- Completed a certified Data Analyst internship at Deloitte, gaining hands-on experience in data analysis with Excel and creating interactive dashboards using Tableau.

Technical Skills

Languages:C, Java,Python,HTML

Web Dev Tools: VScode, Git, Github

Cloud/Databases: Relational Database(mySql)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Machine Learning,Artificial Intelligence.

Soft Skills: Self-learning, Presentation, Adaptability,Teamwork

Participations

•Participation in Hackwithinfy Hackathon 2025

•Participation in Adobe Hackathon
